

Editing an HTML Form

- Download the zipped folder “sampleform.zip” and extract the contents into your student folder.
- Use an HTML editor to open the file **sampleform.html** and make the following changes:
 - Change the <title> to “NYC Registration Form.”
 - Fix the link to the image so that the image can be seen.
 - Change the bus departure location to Radio City Music Hall.
 - Change the “Name, Address, Phone, and E-mail” section, change the heading to a heading level 2 and rename this section “Contact Information.”
 - Change the zip code field size and maximum length to 5 characters.
 - Put the text and <input> fields after the “Position at School” section in a <p>aragraph to make the spacing consistent from section to section.
 - In the “School Building” section, add Forrest Gump Elementary as a choice.
 - In the “Trip Events” section, change the checkboxes so that only the “The Rockettes at Radio City” checkbox is checked by default.
 - In the “Payment” section, remove Billpoint as a payment option.
 - In the “Payment” section, add line breaks to Doug’s name and address so that they appear on separate lines.
 - In the “Comments” section, change the size of the text box so that it has 8 rows and 60 columns.
 - In the “Further Info” section, add a row to the table for the committee member Carl Henriksen, whose phone number is 717-333-3333 and whose email is carl@somehow.org. Make sure that a new email will be sent if the link “Email Carl” is followed.
 - In the footer <div> add a hypertext link to send an email to tyson.doug@gmail.com when this link is followed.
- Use an HTML editor to open the file **formstylesheet.css** and make the following changes:
 - Make the following changes to the class “.douginfo”
 1. font-size of 1.2 em
 2. font-weight of bold
 3. color of green.
 - Add the background-color #FFFFCC to the “body.”
 - Add this font stack to the “body”:

```
font-family: "Palatino Linotype", "Book Antiqua", "Palatino", "serif";
```
 - Add a margin-bottom of 2em to all “paragraphs.” (Hint: look for the selector “p”.)
 - Set the “h1” text-align to center and change the color to #3EAEB4.
 - Give the hr a background-color of #3EAEB4.
 - Add the following styling for the table body:

```
tbody {
    background: #CD853F;
}
```
 - In the “.footer” class, make these changes:
 1. change the text so that it is 1.2em in size
 2. change the height to 2em.
