

# Assignment #11: Screencast

---

## Assignment

A screencast is a digital recording of computer screen output, also known as a video screen capture, often containing audio narration. The term screencast compares with the related term screenshot; whereas screenshot is a picture of a computer screen, a screencast is essentially a movie of the changes over time that a user sees on a computer screen, enhanced with audio narration. (OC Rubric)

For this assignment, you are going to create a 1 minute screencast demonstrating/teaching any software or web-based tool for creating any type of multimedia element (text, graphics, audio, video, animation).
